

The Canonical Suno Process

Mastering Timbre, Power, and Lyric Control

Prepared By Timothy C.

Process Overview

This protocol utilizes a sophisticated dual-branch loop designed to maximize audio fidelity and consistency. By alternating between **Ghost-Track Skeletons**, **Style Covers**, and **Lyric Reinforcement**, we ensure that the final output maintains the desired power and vocal timbre across the entire track.

Branch A: The Initial Build-and-Polish Loop

- Step 1. Genesis:** Create initial song from full lyrics + detailed style prompt.
- Step 2. Selection:** Pick the best take as your seed.
- Step 3. Ghosting:** Extend from the *end* with no style and no lyrics to generate a ghost-track skeleton.
- Step 4. Timbre Restore:** Cover that ghost track with **style only** to restore power and timbre.
- Step 5. Reinforcement:** Extend from the cover at 0:01 with **style only**.
- Step 6. Lyric Inject 1:** Extend from Extend 1 at 0:06 with **lyrics only**.
- Step 7. Lyric Inject 2:** Extend from Extend 2 at 0:01 with **lyrics only**.
- Step 8. Assembly:** Get **Full Song** from Extend 3.
- Step 9. Remix:** Remix the full song using **Styles & Lyrics** with a simple style.
- Step 10. Final Polish:** Extend from the remix at 0:01 with both style and lyrics.
- Step 11. Assemble A:** Get **Full Song** again.
- Step 12. Base Cover:** Cover the full song with lyrics and simple style.
- Step 13. Bridge Fix:** Extend from the *bridge or middle* with **lyrics only**.
- Step 14. Master Preparation:** Get **Full Song** from the bridge-fixed extend.
- Step 15. Remaster:** Apply initial remastering.

End of Branch A — Proceed to Page 2 for Branch B Reset

Branch B: The Remastered Reset & Reinforcement

This phase acts as a high-fidelity "second pass" to solidify the gains made in Branch A.

Step 16. Blank Reset: Cover the remastered version with **no style and no lyrics**.

Step 17. Style Re-Application: Cover that blank version with **style**.

Step 18. Anchor: Extend from that cover at 0:01 with **style only**.

Step 19. Lyric Loop 1: Extend from Extend 1 at 0:06 with **lyrics only**.

Step 20. Lyric Loop 2: Extend from Extend 2 at 0:01 with **lyrics only**.

Step 21. Assembly B: Get **Full Song** from Extend 3.

Step 22. Final Style Remix: Remix with **Use Styles & Lyrics** and a simple style.

Step 23. Final Sync: Extend from 0:01 with both style and lyrics.

Step 24. Full Composite: Get **Full Song**.

Step 25. Style Cover: Cover with lyrics and simple style.

Step 26. Structural Fix: Extend from the bridge or middle with **lyrics only**.

Step 27. Final Export: Get **Full Song** from Extend 1.

Step 28. Final Remaster: Apply final remastering and small cleanup.

Timothy C. — Suno Mastering Protocol

Workflow: Build → Polish → Reset → Reinforce → Master.
